

The West Whins Zoe Aygo is parked in the West Whins car park, just after the Trees for Life building at The Park Eco-Village in Findhorn. On entering The Park, drive to the top of “the runway”. Then turn left just before the first row of new terraced houses. Trees for Life is the second building on the left. The car park is on the left just after it, as shown below:

The keys are kept in a key box on the fence beside the charge point, as shown below. When putting the key fob back in the key box, it is easiest if you first push the top edge of the key into the top back corner of the key box, and then slide the end with the ring on it into the back of the bottom of the key box. The next person can then use the ring to pull the key fob out of the key box.
